Git,SVN

WORK EXPERIENCE

Associate Software Engineer

Tech Mahindra Ltd

07/2014 – 05/2017

Hyderabad, India

Achievements/Tasks

- As an offshore backend developer, responsible for requirements gathering by going through the functional specification documents and coordinating with Business Analysts.
- Understanding System Requirements, Functional flow, and dependencies by attending the walkthrough session with Independent Software Vendors (ISVs). Responsible for defining, developing, and evolving software in a fast-paced and agile development environment using the latest software development methods and infrastructure.
- Participated in Design, Development, Unit Testing and Bug Fixing of the deliverables.
- Gained knowledge on the Spring MVC framework along with the basic features of core spring framework like Inversion of Control, Dependency Injection, and Aspect-oriented programming. Also, I gained knowledge on ORM framework integrations such as Hibernate.
- Worked with other software leads on developing, testing processes and frameworks. Followed SDLC best practices such as continuous integration, automated unit test, and regression testing, etc and focused on end to end quality of the delivery.
- Received Accolades from management for following good coding practices and efficient deliverables with minimal defects.

Senior Software Engineer

Accenture

06/2017 – Present

Hyderabad,India

Achievements/Tasks

- Participated in the development of AEM content type models, workflows, templates, components, and implementation of user permissions.
- Worked on content authoring, Component development in AEM 6.4 with hands on experience in Setup and configuration of AEM authoring, publish, and dispatcher environments with Adobe recommended best practices.
- Worked on creating templates, pages, components, dialogs, Servlets, Workflows in AEM and provided assistance in deploying applications to Dev, QA, Stage and Production environments.
- Closely Worked with the FED team to integrate the Sightly code inside the HTML markup and integration of CSS, JS client libraries with the AEM components and Followed best practices for secure web programming and deployment. Adhered to internal best practices with respect to coding standards, unit test coverage, automation, and continuous integration.
- Worked on Creating and deploying AEM bundles using apache Maven and had hands on experience with Continuous Integration tools like Jenkins/Maven/GitHub.
- Gained experience with Java Content Repository (API) suite, Sling web framework, Apache Felix OSGi framework, CRX/DE, Sites,DAM administration with both touch UI and Classic UI.
- Participated in Design, Development, Unit Testing, Bug Fixing of the deliverables and Responsible for writing Authoring Guides and Technical Design documents.

PERSONAL PROJECTS

Automatic File Manager (09/2013 – 02/2014)

- Automatic File Manager is a .Net based software that automates file operations on a local PC. Usually, managing each & every file in a directory is a hectic job and consumes a significant amount of time, Especially if the no of files is more. It is a tool through which a user can assign rules based on constraints like file extension, filename, file size and last date of modification...etc. and perform operations such as copying, moving, renaming and deleting temporarily or permanently.
